

Member Surname Index

The Member Surname Index is published periodically by the Johnson County Genealogical Society in its quarterly publication, the *Genealogist*, and is displayed continuously on the society's web site. Each member is entitled to 10 listings in the Surname Index. Family memberships are entitled to 20 listings. In addition to the event data, **the published index will include the member's address unless the member requests that address information not be listed.** Of course this may defeat the purpose of the Surname Index to bring together people who wish to share information about persons shown on the listings.

Each listing consists of one event at one time for one individual in one location. Events should be birth, marriage, death or resided and each listing should show one individual only. If you wish to show both persons being married, you should show the same marriage on two lines, each showing one of the individuals.

For updates, all old information will be deleted from the Surname Index and will be replaced with the information on this form. Be sure to resubmit any information you don't want deleted.
